

HARMONIC RESOLUTION SYSTEM'S MXR AUDIO STAND – Ultra High-end at its Best! Take Control!

"In the world of ultra-high end audio and video, only a few companies can lay claim to having created a component that has a performance advantage the leaves everything else in the dust. Harmonic Resolution's MXR Audio Stand is in that select group. Nothing else comes close!"

Terry Menacker, President of Overture

Many high-end components "look" beautiful, and are expensive, but fail to deliver the performance you expect. If you are seeking the ultimate in uncompromising audio and video performance and refinement the HRS "MXR" equipment stand will be a revelation.

From the moment you see and touch a MXR stand, you are aware that it is special. The world's most advanced vibration control technologies are incorporated in a visually striking design that can be used in the most elegant décor. Fit and finish rival the finest luxury car, and furniture.

The options to expand and configure the MXR stand are virtually unlimited. So if your system changes, it's no problem. When you place your components on an MXR stand the results are amazing; lower noise floor, more inner detail, elimination of glare, tighter faster bass with more

impact, increased dimension and soundstage with far more precise imaging. The difference in analog playback is astonishing.

We invite you to audition the complete HRS line at Overture. We feature the MXR Audio Stands, M3 Isolation Bases, Damping Plates, Nimbus products and Analog Disk record weight.

Please call 1.800.838.1812 for more information about these unique products.
